

The DCD Medical Building Cost Per Square Foot Analysis

The Medical Building Cost Per Square Foot Analysis is compiled from actual medical new construction projects published by Design Cost Data™ magazine. This guide will provide DCD readers a quick comparison of medical building construction costs on similar size projects.

The cost per square foot reflects common design features throughout the U.S. and *does not include* architectural and engineering fees. All projects were escalated to April 2011 and then to select cities that are present on each case study data page featured in DCD.

The actual projects used for this comparison are housed in the DCD Archives™ at DCD.COM. The DCD Archives include over 1,300 projects of all types with regional modifiers and cost escalators through 2016 for cost modeling. For more project information login at www.dcdarchives.com.
